

Quality Policy

Supply to Customers excellent performance, in terms of product quality, delivery time for products and services are the priority objectives defined by CDB Engineering management, in order to achieve explicit and underlying requirements of Customers and stakeholders.

Management recognizes Quality Assurance principles as the main instrument to attain this macro-objective, through:

- Continuous improvement of supplied products and services, of Quality Management System processes and efficacy, according to requirements of ISO 9001:2015 and APIQ1 Ninth. Ed.
- Compliance with regulatory, contractual and stated requirements;
- Compliance with applicable technical normative (e.g., ASME, PED, API6D) to manufactured products (plants, valves, components);
- Prevention, reduction and progressive removal on non-conformities of products, processes, and services;
- Formalized, controlled and traceable maintenance of the Company know-how (on company server or ERP system).

Management appointed, within Company staff, a Quality Management Representative, having specific authority to issue, apply and improve a Quality Management System compliant to UNI EN ISO 9001:2015 and APIQ1 Ninth Ed., to provide feedback to CDB Management, and to support and develop importance of Customer Satisfaction.

Once a year, Management defines objectives and goals for continuous improvement of Quality performances, consistent with above mentioned commitments, and communicates them to all employee, in order to apply them to all processes, product and services provided by CDB Engineering SPA, according to Market logic.

To reach above mentioned objectives, commitment of all resources is fundamental in order to embrace this policy and reach more and more ambitious goals, through a continuous improvement of individual performance.

Therefore, we ask all staff to act in conformity with rules defined in the Company Quality Manual and in the relative Procedures, providing feedback for ongoing development of System.

Suppliers of products and services, as well as CDB Engineering partners, regarded as integral part of Quality Management System, should comply with this policy.

Therefore this Quality Policy is spread to all CDB personnel, to all partners and is supported by all Company levels; Company will also constantly review and, when necessary, update the content of this Policy, in order to guarantee its pertinence in changing conditions, internal and external.
